3/ Strategic Growth and Market Adaptation	17

1. Introduction

The PROapp is an integrated platform that brings customers, tradespeople, and suppliers together to one seamless workflow of task management, skill certification, and material procurement. It makes it easy to post tasks, bid for tasks, execute tasks, or perform supply chain management.

2. The Main Workflows in Brief

2.1 Task Workflow

1. Customer creates a TASK.
2. Tradespeople submit BIDS for the TASK.
3. Customer selects a BID, changing the TASK status to "Assigned".
4. Assigned TRADESPERSON updates TASK status to "In Progress".
5. TRADESPERSON completes the TASK, updating status to "Completed".
6. Customer reviews and confirms completion, triggering TASK_TRANSACTION creation.

2.2 Material Procurement

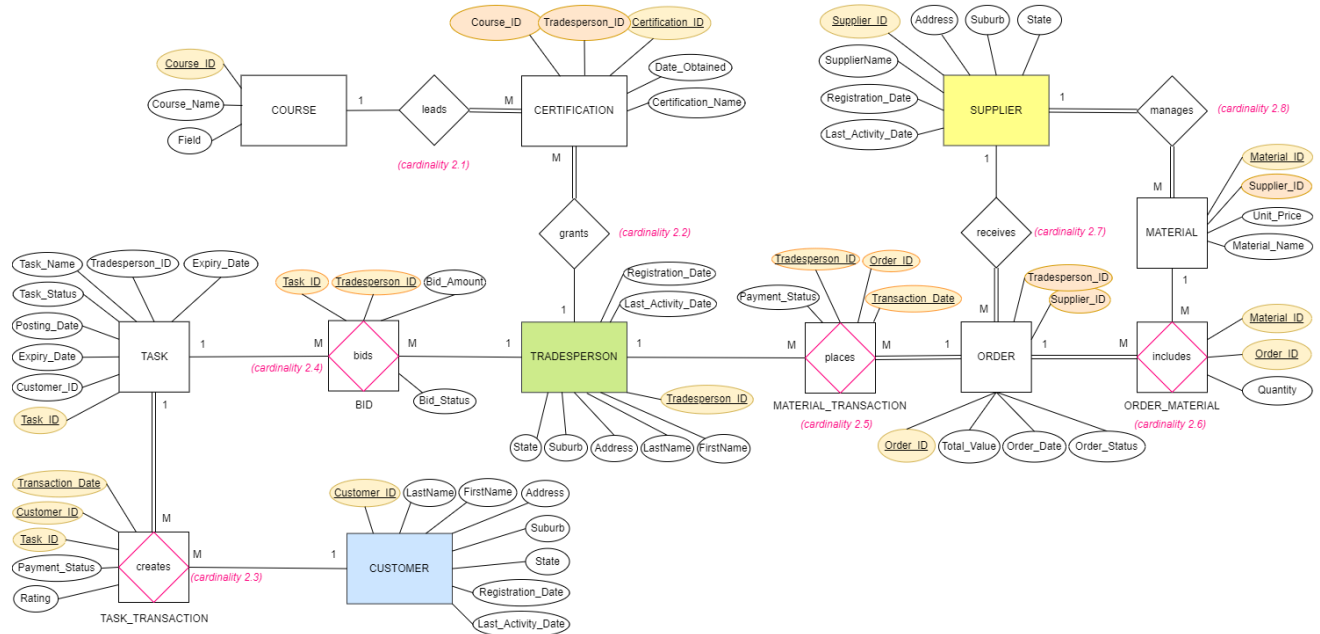

1. TRADESPERSON places ORDER for needed MATERIAL.
2. System assigns ORDER to appropriate SUPPLIER.
3. SUPPLIER fulfills ORDER, updating ORDER_STATUS.
4. TRADESPERSON receives MATERIALS, confirming delivery in the system.
5. System creates SUPPLY_TRANSACTION to record the procurement.

2.3 Transaction

1. Payment by customer held in escrow on accepted BID.
2. Upon task completion and customer confirmation, payment is released to TRADESPERSON.
3. System deducts a service fee before releasing payment.
4. Payment in SUPPLY_TRANSACTIONS will be executed by the system from TRADESPERSON to SUPPLIER.

PART A: THE DATABASE OF THE PROAPP

1. ER Diagram of the Platform

2. Entity Attributes, Cardinality and Participation

Table 1: Entities and Attributes	
1. COURSE <ul style="list-style-type: none"> Course_ID (PK) Course_Name Field 	<pre>-- Create COURSE table CREATE TABLE COURSE (Course_ID INT PRIMARY KEY AUTO_INCREMENT, Course_Name VARCHAR(100) NOT NULL, Field VARCHAR(50));</pre>
2. CERTIFICATION <ul style="list-style-type: none"> Certification_ID (PK) Certification_Name Course_ID (FK to COURSE) Tradesperson_ID (FK to TRADESPERSON) Date_Obtained 	<pre>-- Create CERTIFICATION table CREATE TABLE CERTIFICATION (Certification_ID INT PRIMARY KEY AUTO_INCREMENT, Certification_Name VARCHAR(100) NOT NULL, Course_ID INT, Tradesperson_ID INT, Date_Obtained DATE, FOREIGN KEY (Course_ID) REFERENCES COURSE(Course_ID), FOREIGN KEY (Tradesperson_ID) REFERENCES TRADESPERSON(Tradesperson_ID));</pre>

<p>3. TRADESPERSON</p> <ul style="list-style-type: none"> • Tradesperson_ID (PK) • FirstName • LastName • Address • Suburb • State • Registration_Date • Last_Activity_Date 	<pre>-- Create TRADESPERSON table CREATE TABLE TRADESPERSON (Tradesperson_ID INT PRIMARY KEY AUTO_INCREMENT, FirstName VARCHAR(50) NOT NULL, LastName VARCHAR(50) NOT NULL, Address VARCHAR(100), Suburb VARCHAR(50), State VARCHAR(20), Registration_Date DATE, Last_Activity_Date DATE);</pre>
<p>4. CUSTOMER</p> <ul style="list-style-type: none"> • Customer_ID (PK) • FirstName • LastName • Address • Suburb • State • Registration_Date • Last_Activity_Date 	<pre>-- Create CUSTOMER table CREATE TABLE CUSTOMER (Customer_ID INT PRIMARY KEY AUTO_INCREMENT, FirstName VARCHAR(50) NOT NULL, LastName VARCHAR(50) NOT NULL, Address VARCHAR(100), Suburb VARCHAR(50), State VARCHAR(20), Registration_Date DATE, Last_Activity_Date DATE);</pre>
<p>5. TASK</p> <ul style="list-style-type: none"> • Task_ID (PK) • Customer_ID (FK to CUSTOMER) • Task_Name • Task_Status (Posted, Bidding, Assigned, In Progress, Completed) • Posting_Date • Expiry_Date • Tradesperson_ID (FK to TRADESPERSON) 	<pre>-- Create TASK table CREATE TABLE TASK (Task_ID INT PRIMARY KEY AUTO_INCREMENT, Customer_ID INT, Task_Name VARCHAR(100) NOT NULL, Task_Status ENUM('Posted', 'Bidding', 'Assigned', 'In Progress', 'Completed') NOT NULL, Posting_Date DATE, Expiry_Date DATE, Tradesperson_ID INT, FOREIGN KEY (Customer_ID) REFERENCES CUSTOMER(Customer_ID), FOREIGN KEY (Tradesperson_ID) REFERENCES TRADESPERSON(Tradesperson_ID));</pre>

<p>6. ## PART B: BUSINESS INSIGHTS

### A Three-Pronged Approach

PROapp stands at a crucial juncture in its development, with significant opportunities for growth and improvement. The strategic focus on these three interrelated areas creates a virtual circle: platform improvement, operational excellence, and strategic expansion.

#### 1/ User-Centric Platform Enhancement

##### Query 1: User Retention and Engagement

As low user retention could lead to increasing new user acquisition costs, this query calculates the retention rate of users (both tradespeople and customers) who remain active after 6 months. It helps analyze the trends of user engagement over the different years of their registration.

```

1 -- Query 1: Retention Rate
2 • SELECT
3 YEAR(Registration_Date) AS registration_year,
4 COUNT(*) AS total_registered,
5 SUM(CASE WHEN DATEDIFF(Last_Activity_Date, Registration_Date) > 180 THEN 1 ELSE 0 END) AS active_after_6months,
6 (SUM(CASE WHEN DATEDIFF(Last_Activity_Date, Registration_Date) > 180 THEN 1 ELSE 0 END) * 100.0 / COUNT(*)) AS retention_rate
7 FROM (
8 SELECT Registration_Date, Last_Activity_Date FROM TRADESPERSON
9 UNION ALL
10 SELECT Registration_Date, Last_Activity_Date FROM CUSTOMER
11) AS all_users
12 GROUP BY YEAR(Registration_Date)
13 ORDER BY registration_year;

```

|   | registration_year | total_registered | active_after_6months | retention_rate |
|---|-------------------|------------------|----------------------|----------------|
| ▶ | 2022              | 5                | 4                    | 80.00000       |
|   | 2023              | 9                | 9                    | 100.00000      |
|   | 2024              | 1                | 0                    | 0.00000        |

## Query 2: Geographic Distribution of Users

Since certain states may receive more attention in terms of marketing or support activities, this query shows the distribution of tradespeople and customers across different states, allowing for targeted regional strategies and identifying areas for user base expansion.

```

1 -- Query 2: Geographic Distribution of Users
2 • SELECT
3 'Tradesperson' AS user_type,
4 State,
5 COUNT(*) AS user_count
6 FROM TRADESPERSON
7 GROUP BY State
8 UNION ALL
9 SELECT
10 'Customer' AS user_type,
11 State,
12 COUNT(*) AS user_count
13 FROM CUSTOMER
14 GROUP BY State
15 ORDER BY user_type, user_count DESC, State;

```

|   | user_type    | State            | user_count |
|---|--------------|------------------|------------|
| ▶ | Customer     | DKI Jakarta      | 2          |
|   | Customer     | Bali             | 1          |
|   | Customer     | Jawa Tengah      | 1          |
|   | Customer     | Sumatera Utara   | 1          |
|   | Tradesperson | DKI Jakarta      | 2          |
|   | Tradesperson | Jawa Timur       | 2          |
|   | Tradesperson | Bali             | 1          |
|   | Tradesperson | DI Yogyakarta    | 1          |
|   | Tradesperson | Jawa Barat       | 1          |
|   | Tradesperson | Jawa Tengah      | 1          |
|   | Tradesperson | Sulawesi Selatan | 1          |
|   | Tradesperson | Sumatera Selatan | 1          |

### Query 3: New User Onboarding Efficiency

Because complicated onboarding might prevent new users from fully engaging with the platform, this query shows how quickly new tradespeople engage with the platform, taking on their first task and getting certifications that help in finding potential improvements in the onboarding process.

```

1 -- Query 3: New User Onboarding Efficiency
2 • SELECT
3 tp.Tradesperson_ID,
4 DATEDIFF(MIN(t.Posting_Date), tp.Registration_Date) AS days_to_first_task,
5 COUNT(DISTINCT c.Certification_ID) AS certifications_count
6 FROM TRADESPERSON tp
7 LEFT JOIN TASK t ON tp.Tradesperson_ID = t.Tradesperson_ID
8 LEFT JOIN CERTIFICATION c ON tp.Tradesperson_ID = c.Tradesperson_ID
9 GROUP BY tp.Tradesperson_ID, tp.Registration_Date
10 ORDER BY days_to_first_task DESC;

```

|   | Tradesperson_ID | days_to_first_task | certifications_count |
|---|-----------------|--------------------|----------------------|
| ▶ | 1               | 712                | 2                    |
|   | 4               | 690                | 1                    |
|   | 2               | 471                | 2                    |
|   | 3               | 274                | 1                    |
|   | 5               | NULL               | 1                    |
|   | 6               | NULL               | 0                    |
|   | 7               | NULL               | 0                    |
|   | 8               | NULL               | 0                    |
|   | 9               | NULL               | 0                    |
|   | 10              | NULL               | 0                    |

## 2/ Optimized Operations and Quality Control

### Query 4: Task Completion Rate and Customer Satisfaction

Since low task completion rates or customer satisfaction may indicate issues with the platform's effectiveness, this query calculates the overall task completion rate and average customer rating for completed tasks, providing insights into platform efficiency and user satisfaction.

```

1 -- Query 4: Task Completion Rate and Customer Satisfaction
2 • SELECT
3 COUNT(*) AS total_tasks,
4 SUM(CASE WHEN Task_Status = 'Completed' THEN 1 ELSE 0 END) AS completed_tasks,
5 (SUM(CASE WHEN Task_Status = 'Completed' THEN 1 ELSE 0 END) * 100.0 / COUNT(*)) AS completion_rate,
6 AVG(CASE WHEN Task_Status = 'Completed' THEN tt.Rating ELSE NULL END) AS avg_rating
7 FROM TASK t
8 LEFT JOIN TASK_TRANSACTION tt ON t.Task_ID = tt.Task_ID;

```

|   | total_tasks | completed_tasks | completion_rate | avg_rating |
|---|-------------|-----------------|-----------------|------------|
| ▶ | 10          | 3               | 30.00000        | 4.6667     |

### Query 5: Tradesperson Performance and Quality Control

Since ensuring consistent quality of service is crucial for platform reputation and customer satisfaction, this query provides an overall view of tradesperson performance, including total tasks, certifications, and task completion rates, helping identify top performers and areas for quality improvement.

```

1 -- Query 5: Tradesperson Performance and Quality Control
2 • SELECT
3 tp.Tradesperson_ID,
4 COUNT(DISTINCT t.Task_ID) AS total_tasks,
5 AVG(tt.Rating) AS avg_rating,
6 COUNT(DISTINCT c.Certification_ID) AS certifications_count
7 FROM TRADESPERSON tp
8 LEFT JOIN TASK t ON tp.Tradesperson_ID = t.Tradesperson_ID
9 LEFT JOIN TASK_TRANSACTION tt ON t.Task_ID = tt.Task_ID
10 LEFT JOIN CERTIFICATION c ON tp.Tradesperson_ID = c.Tradesperson_ID
11 GROUP BY tp.Tradesperson_ID
12 ORDER BY
13 CASE WHEN AVG(tt.Rating) IS NULL THEN 1 ELSE 0 END,
14 avg_rating DESC,
15 total_tasks DESC;

```

|   | Tradesperson_ID | total_tasks | avg_rating | certifications_count |
|---|-----------------|-------------|------------|----------------------|
| ▶ | 2               | 2           | 5.0000     | 2                    |
|   | 1               | 2           | 4.5000     | 2                    |
|   | 3               | 2           | NULL       | 1                    |
|   | 4               | 1           | NULL       | 1                    |
|   | 5               | 0           | NULL       | 1                    |
|   | 6               | 0           | NULL       | 0                    |
|   | 7               | 0           | NULL       | 0                    |
|   | 8               | 0           | NULL       | 0                    |
|   | 9               | 0           | NULL       | 0                    |
|   | 10              | 0           | NULL       | 0                    |

### Query 6: Supply Chain Efficiency

Since inefficient supply chain management can affect tradesperson satisfaction and task completion rates, this query evaluates supplier performance based on order fulfillment times and total order values, helping identify reliable suppliers and potential supply chain bottlenecks.

```

1 -- Query 6: Supply Chain Efficiency
2 • SELECT
3 s.Supplier_ID,
4 s.SupplierName,
5 COUNT(o.Order_ID) AS total_orders,
6 AVG(DATEDIFF(mt.Transaction_Date, o.Order_Date)) AS avg_fulfillment_time_indays,
7 SUM(o.Total_Value) AS total_order_value
8 FROM SUPPLIER s
9 JOIN `ORDER` o ON s.Supplier_ID = o.Supplier_ID
10 JOIN MATERIAL_TRANSACTION mt ON o.Order_ID = mt.Order_ID
11 GROUP BY s.Supplier_ID, s.SupplierName
12 ORDER BY avg_fulfillment_time_indays;

```

|   | Supplier_ID | SupplierName         | total_orders | avg_fulfillment_time_indays | total_order_value |
|---|-------------|----------------------|--------------|-----------------------------|-------------------|
| ▶ | 4           | DinginSejuk AC       | 1            | 2.0000                      | 1800000.00        |
|   | 5           | BatuPerkasa Masonry  | 1            | 2.0000                      | 1500000.00        |
|   | 3           | KayuMakmur Materials | 2            | 2.5000                      | 8700000.00        |
|   | 1           | PipaJaya Supplies    | 2            | 5.0000                      | 2975000.00        |
|   | 2           | ElektroMegah Parts   | 2            | 5.0000                      | 5250000.00        |

### 3/ Strategic Growth and Market Adaptation

#### Query 7: Certification Impact on Task Assignment

Since understanding how certifications affect task assignments can guide training initiatives, this query shows how different certifications correlate with task assignments and average bid amounts, helping identify valuable skills and potential areas for new course offerings.

```

1 -- Query 7: Certification Impact on Task Assignment
2 • SELECT
3 c.Course_ID,
4 co.Course_Name,
5 COUNT(DISTINCT t.Task_ID) AS assigned_tasks,
6 AVG(b.Bid_Amount) AS avg_bid_amount
7 FROM CERTIFICATION c
8 JOIN COURSE co ON c.Course_ID = co.Course_ID
9 JOIN TRADESPERSON tp ON c.Tradesperson_ID = tp.Tradesperson_ID
10 LEFT JOIN TASK t ON tp.Tradesperson_ID = t.Tradesperson_ID
11 LEFT JOIN BID b ON t.Task_ID = b.Task_ID AND b.Tradesperson_ID = tp.Tradesperson_ID
12 GROUP BY c.Course_ID, co.Course_Name
13 ORDER BY assigned_tasks DESC;

```

|   | Course_ID | Course_Name             | assigned_tasks | avg_bid_amount |
|---|-----------|-------------------------|----------------|----------------|
| ▶ | 1         | Basic Plumbing          | 2              | 900000.000000  |
|   | 2         | Advanced Electrical     | 2              | 2250000.000000 |
|   | 3         | Carpentry Fundamentals  | 2              | 3500000.000000 |
|   | 4         | HVAC Essentials         | 1              | 1200000.000000 |
|   | 5         | Construction Techniques | 0              | NULL           |

## Query 8: User Specialization Trends

Since identifying popular trends can guide platform development and marketing efforts, this query shows the distribution of tradespeople across different specialization fields and their average bid amounts, helping identify high-demand and high-value skills.

```

1 -- Query 8: User Specialization Trends
2 • SELECT
3 co.Field,
4 COUNT(DISTINCT c.Tradesperson_ID) AS tradesperson_count,
5 AVG(b.Bid_Amount) AS avg_bid_amount
6 FROM COURSE co
7 JOIN CERTIFICATION c ON co.Course_ID = c.Course_ID
8 JOIN TASK t ON c.Tradesperson_ID = t.Tradesperson_ID
9 JOIN BID b ON t.Task_ID = b.Task_ID AND b.Tradesperson_ID = c.Tradesperson_ID
10 GROUP BY co.Field
11 ORDER BY tradesperson_count DESC;

```

|   | Field      | tradesperson_count | avg_bid_amount |
|---|------------|--------------------|----------------|
| ► | Carpentry  | 1                  | 3500000.000000 |
|   | Electrical | 1                  | 2250000.000000 |
|   | HVAC       | 1                  | 1200000.000000 |
|   | Plumbing   | 1                  | 900000.000000  |

## Query 9: Platform Value Creation

Since understanding revenue streams and growth patterns is crucial for strategic planning, this query provides a monthly breakdown of tasks, total bid values, and completed transaction values, offering insights into platform value creation.

```

1 -- Query 9: Platform Growth
2 • SELECT
3 YEAR(t.Posting_Date) AS year,
4 MONTH(t.Posting_Date) AS month,
5 COUNT(DISTINCT t.Task_ID) AS total_tasks,
6 SUM(b.Bid_Amount) AS total_bid_value,
7 SUM(CASE WHEN tt.Payment_Status = 'Completed' THEN b.Bid_Amount ELSE 0 END) AS completed_transaction_value
8 FROM TASK t
9 LEFT JOIN BID b ON t.Task_ID = b.Task_ID AND b.Bid_Status = 'Accepted'
10 LEFT JOIN TASK_TRANSACTION tt ON t.Task_ID = tt.Task_ID
11 GROUP BY YEAR(t.Posting_Date), MONTH(t.Posting_Date)
12 ORDER BY year, month;

```

|   | year | month | total_tasks | total_bid_value | completed_transaction_value |
|---|------|-------|-------------|-----------------|-----------------------------|
| ► | 2024 | 1     | 2           | 4000000.00      | 4000000.00                  |
|   | 2024 | 2     | 3           | 3500000.00      | 800000.00                   |
|   | 2024 | 3     | 5           | 7000000.00      | 0.00                        |
